

# PAWS™ | Partners in Purpose

*A Path of Structure, Calm Leadership, and Meaningful Connection*

## Who This Is For

This opportunity is designed for veterans seeking purpose, responsibility, and growth through structure and relationship. It is not intended as a rescue or crisis program. Participation is intentional and guided by mutual readiness.

## What Participation Looks Like

Participants engage in daily rhythm, calm leadership practices, and shared responsibility with developing dogs. Consistency, presence, and regulation form the foundation of the work.

## The Role of the Dog

Dogs within PAWS™ are not tools or emotional support devices. They are partners in leadership and regulation. Growth occurs through shared structure, mutual trust, and calm presence.

## Support & Safety

Guidance and structure are provided throughout participation. Veterans are supported as they build skills, confidence, and leadership capacity. No one is expected to step into responsibility without preparation.

## Readiness & Alignment

Participation requires openness to structure, willingness to learn, and respect for the process. Alignment is assessed through conversation to ensure a healthy fit for both people and dogs.

## Next Steps

Participation begins with a conversation. There is no pressure or obligation. The process is guided by mutual discernment and respect.
